# What is citizen science?

# Leveraging existing citizen science data for SDG monitoring and reporting in Ghana

# Trust in citizen science data

## Academia experience on building trust on citizen science across various stakeholders

Encure inclusiveness through meaningful engagement of all stakeholders

Create time and space for these stakeholders to meet and connect

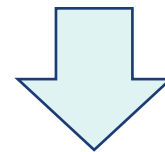

Listen and understand the motivations, interests and concerns

Be transparent about citizen science results and methodologies, especially how these methodologies were implemented

Citizens and communities are no free labor to close government data gaps; they should receive a share of the benefit from participating

**CITIZEN SCIENCE** | GLOBAL PARTNERSHIP

// OUR VISION

Engage, learn  
and earn while  
being rewarded

Goal: Impact **100+ million youth** through technology & partnerships
