MISSION & VALUES

Advancing biodiversity conservation through participatory and citizen science while fostering collaboration, inclusivity, and knowledge exchange across communities, research, and practice. We value diverse perspectives and support meaningful engagement among citizen scientists, practitioners, researchers, and local communities worldwide.

WHAT WE DO

Connecting a global network to share knowledge, build capacity, support collaboration, and promote citizen science in conservation research, management, and policy. Through outreach, networking, and knowledge exchange, we help strengthen the impact and visibility of citizen science for biodiversity conservation.

PaCS MEMBERS BY SCB REGION

Our global community spans all SCB regions, advancing participatory and citizen science for biodiversity conservation.

TOTAL MEMBERS: 146

PaCS WORKING GROUP TIMELINE

A decade of growth, collaboration, and impact in participatory and citizen science

LOOKING AHEAD

We are expanding opportunities for connection, learning, and collaboration through introducing a newsletter, open Slack space, and an online course with webinars. We will also strengthen JEDI initiatives, student engagement, and launch a new member survey to guide our next steps.
